Subject: H114 - Router Hardening

The IT Auditors want assurance that we have hardened the hind-end router according to best practices. Refer to the CISCO guidelines at: <https://www.cisco.com/c/en/us/support/docs/ip/access-lists/13608-21.html>. Develop a business memo that lists all the steps that you have taken to harden the router from a security perspective. Include screen shots to show the various features configured in the IOS.

Thank you.

IT Director
