From: CIO

To: IT Staff

Subject: Scoring Inquiries

Use this inject to submit questions to the scoring managers as to why a service is not scoring properly. Response from the scoring managers is at their discretion and will use the notification feature of the ISE/team portal. Teams should keep in mind it is their responsibility to determine why services are not properly scoring and to take corrective action. The Windows 10 workstation outside the firewall is intended to assist teams in monitoring services.

Thank you.
