Subject: [R-101] Cloud Egress Access

The CIO is attempting to save cost. As a result, he is deploying a cloud for developer access.

You are ordered to:

*Provide full TCP 80,53,443, egress access to 10.0.0.0/8 network, where the cloud has been deployed.

This WILL be a scored objective. Respond with a memo that acknowledges that this is ready. Scoring on this service will start when the inject closes.

Thank you.
