**Subject:** DD01 - Business Partnership Connection

Our company has established a business partnership with another firm to collaborate on a major project. The partnership requires direct connection to our services via our main switch. There are security provision downstream from our switch. Connections are provisioned on ports f0/7, and f0/15 of the switch. It is imperative these connections remain up. These should be set to auto speed and duplex and access mode interfaces.

Reply with a business memo, documenting this configuration with screen shots from the CLI.

Thank you.
