Subject: P101 - ZenCart Errors

We are getting reports from our customers that our ZenCart store is redirecting to another company. With some research, we have found that the error likely lies in the server configuration. Please check the configuration for the HTTP_SERVER variable in the web site directory in the following files includes/configure.php and admin/includes/configure.php. This file should be our public IP for the ZenCart server in the the format of "http://172.25.X.34" where "X" is replaced by our team number. Reply with a confirmation that this has been complete.

Thank you.
