**Inject Start Date/Time:** Fri, 23 Mar 2018 18:26:40 -0500

**From:** IT Security

**To:** Infrastructure Team

**Subject:** [B-101] Harden Servers

The auditors are evaluating our compliance with NIST 800-171 and discovered that software firewalls need to be implemented on each server. Implement these tools on each server and defined rules to only permit the expected services for each server to be available. Develop a business memo documenting your work for each server, including screen shots showing the firewalls services enabled.

Thank you.
