Subject: 3.1.20 Restrict access to Facebook for all users, create exception policy

For compliance reasons we need to limit access to Facebook for most users. HR still will require access so we will need an exception policy created so that HR can still access the site. Configure your firewall to deny access to Facebook by default. Create a new rule that allows access to Facebook using Application ID and restrict the policy to only members belonging to an Active Directory security group specific to the Human Resources department.

Thank you.

IT Director
