

Quest #5: Words Pt. 1

*Some people are just
Really good with their words
...but not two Hunters*

Writing is one of the most creative art forms. Many tales are told of legendary figures – from great warriors to great humorists – whose use of the word has been inscribed into legend.

Unfortunately, the written word is all too often repeated and becomes as if it is a dull sword. IkiruCorp's Division of Simple or Dangerous Linguistics resolves to prevent this disrespectful use of language in our great empire, and employees committing this irresponsible use of language may even be shunned as the Employee of Many *Oyaji Gyagu*!

Daimyos - ensure that you are not committing such disrespectful acts!

- Determine the action that the Questing Division desires (10%).
 - You may choose your own techniques to accomplish this action.
- Completion of this action will be verified at the due time (40%).

Safety is between your ears, not in your hands.

Submission instructions:

- Report back to the Quests Division once the inject is completed.
 - A simple text confirmation in #team-##-quests is sufficient.
