Inject Duration: 45 Minutes

Inject Start Date/Time: Sat, 10 Nov 2018 15:09:07 +0000

From: Director - Systems Engineering

To: Blue Defense Team

Subject: Configure NTP

Consistent time on our network important to generate logs that are useful for troubleshooting and recreating the timelines as to what has happened . We cannot have servers and network equipment showing inaccurate time.

Inject Instructions:

- 1) You are to set up one main clock on the network that every machine will be reconfigured to get the time from.
- 2) Please configure all devices, servers and workstations to get their time from this clock.

Provide screen shots demonstrating that the time is synced across all machines and devices, including the commands and/or utilities used to accomplish the tasks.

Thank you.

Director - Systems Engineering
