Subject: [O-121] Time Change Follow up

The recent change to Daylight Savings Time had some issues. Please review all the servers, FW, Router and switch to insure that the change back to Standard time will be smooth and automatic in the Fall. Reply with a memo that documents for each host and device, what change you made, if any, to insure this happens. Provide screen shots for each showing the configuration element that will assure this functionality.

Thank you.
