

**Team:** Team 08

**Inject Number:** 5

**Inject Duration:** 30 Hours

**Inject Start Date/Time:** Fri, 15 Mar 2019 22:42:56 +0000

**From:** CIO

**To:** IT Team

**Subject:** Revert Snapshot/Scrub Requests

Use this inject to request a VM in your network to be scrubbed, reverted back to its initial state at the start of the competition. Doing so will require the services of tech support and may take some time. Please don't make multiple requests for the same intended scrub.

Teams will be penalized for scrub requests, in accordance with the dictates of the white team.

After tech support has reverted your VM to its initial state, a notification will be sent to your team via the ISE to confirm completion. You will need to power up your VM.

In the event timely action is not taken for your request, please call the Compliance Manager,

David Durkee

440-488-0331

Thank you.
