Subject: H118 - IPv6 Planning

The CIO has committed to a large customer that our network would IPv6 ready in 18 months. The first step is the development of a plan. The company has been given the prefix 2001:db8:a001/48. Using our existing network segmentation develop our new IPv6 addressing scheme. Document this in a report together with a table of devices/OS and if they are currently IPv6 capable or not.

Thank you.

IT Director
