Inject Start Date/Time: Fri, 15 Mar 2019 23:03:43 +0000

From: IT Director

To: Infrastructure Team

Subject: H109 - Web Site Integrity Plan

There is concern that our web pages may become defaced or become compromised to delivery malware to customers. We need to be able to detect changes to the web pages as soon as possible, send alerts and restore them. Develop tools or procedures to accomplish this. Reply with a business memo that documents your approach with screen shots of configuration elements to validate the implementation.

Thank you.

IT Director
