Subject: 3.7.2 Install Network Management System

We need to setup a system to monitor devices on our network. Using the resources below download the prebuilt server, verify you can access the WebUI and configure your Palo Alto so that you can add it as a monitored device within LibreNMS.

VirtualBox OVA: [https://github.com/librenms/packer-](https://github.com/librenms/packer-builds/releases/download/1.47/librenms-ubuntu-18.04-amd64.ova)

[builds/releases/download/1.47/librenms-ubuntu-18.04-amd64.ova](https://github.com/librenms/packer-builds/releases/download/1.47/librenms-ubuntu-18.04-amd64.ova)

Credentials for OVA: <https://docs.librenms.org/Installation/Images/>

LibreNMS user guide: <https://docs.librenms.org/>

PAN OS SNMP Configuration: <https://docs.paloaltonetworks.com/pan-os/8-0/pan-os-web-interface-help/device/device-setup-operations/enable-snmp-monitoring#>

Thank you.

IT Director
