Subject: [O-226] Internal Auditor Report

The CIO has asked to gather all current system user account information into a report for the internal auditors who are here performing an audit for our compliance re-certification. The information report needs to be securely saved into a readable text or PDF document in an accessible directory on one of your internal server systems. Store this document on the Windows 8.1 machine under /Users/Private. Name the document Audit_Compliance. Create a DLP policy on the FW to prevent this file from being sent outbound from the network. Respond with a memo confirming that this is complete, with a screen shot of the directory command and a screen shot of the DLP policy.

Thank you.

CIO
