To: Infrastructure Team

Subject: [R-100] Firewall Co-Management

The CIO is attempting to save cost. As a result, he is outsourcing IT Security audit and co-management to an MSSP.
You are ordered to:
*Provide ssh access from anywhere to the Palo Alto management function. Replay with a document that provides instructions that we can pass along to the management company to access this.

*Please provide the MSSP a super user account, with username: admin2, password: greatpassword02

NOTE: These will be scored services going forward and will be checked periodically.

Thank you.

IT Director
