Subject: H121 - Create a Captive Web Portal

Team 08,

The CIO requires that a captive web portal be implemented on our firewall in order to ensure that only authenticated users are allowed access to the internet. We have a meeting with the CIO in a 1 hours and would like to inform him that this security measure has been implemented. Reply with a business memo that describes how you implemented this together with screen shots documenting the configuration.

Thank you.

IT Director
