Subject: IMAC 1 - Squaring things up here

The Board of Directors are worried about our security posture. With the recent out breaks and attacks in the news, management needs a threat report to be able to present to the Board. Please provide a high level summary of major incidents, blocked attacks, and other major security related controls in place. Gather this data from the PA Threat Log and your own syslog and events logs on the servers. Management also needs this report to be extremely up-to-date in case the Board request the report at anytime. We will be issuing a periodic inject to recreate this report throughout the competition. We will call this the Inject-11 Management Report

Thank you.
